District Competition: Submit names of school winners to Lisa Hockaday to compete at the District Fair.

**January 5, 2024: Deadline to submit Entries and Registration Forms
February 3, 2024: Rockdale County Public Schools District Competition
TBD: Deadline to submit Regional Fair Entries
District Contact: Virnilisa Printup**

Purpose: To involve students in developing a greater passion for the social sciences through researching topics and questions in various disciplines.

Format: Entries will consist of tasks/research-based (student conducted) products and may be an individual or group submission.

Guidelines:

1. Projects may be entered by individual students or by groups of up to three students
2. Projects are limited to a space of **30 inches front to back (depth), 48 inches in width (when opened), and 60 inches in height. (Additional support equipment may be placed under the table, but not at the sides.)**
3. If a project includes audio or video recording, slides, computers, or a combination of these audiovisual media, the total listening/viewing time **may not exceed ten minutes**. Audio media should be presented in such a way that it is not distracting to its neighboring projects.
4. At the district fair, at least one student who worked on the project must be present to interpret the project. Students should be prepared to present a five-minute oral overview of the project to the judges. After all projects have been scored, judging team leaders must use information gleaned from interviews to determine overall winners from among projects receiving the same number of points. When there is no student present on the day of the fair to answer the judges' questions, the project is at a disadvantage.
5. All projects must be accompanied by a research paper of approximately four or five double-spaced typed pages. The paper should give the research question/problem being explored, methodology, research findings, and conclusions of the project. The summary paper must also include bibliographic references. If direct citations are to be used in the summary paper, the proper footnotes should be included.
6. An abstract of the project should be included on an index card. Information on the abstract provides a succinct description of the project, including the title, statement of problem or question, methodology, and conclusion. Students should give this card to the judges at the beginning of the oral interview.
7. The visual presentation must include the following components on a backboard.
8. Project components should meet all criteria shown on the Judges' Scoring Sheet.
9. The construction of the project must be strong enough to remain intact when moved.
10. **Students must furnish all equipment such as extension cords, bulbs, projectors, recorders, and monitors.**
